Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 11-21, drawn to a call pick-up system in a mobile communication network and capable of allocating a channel to a second mobile phone, classified in class 455, subclass 450.
 - II. Claims 7-10 and 22-26, drawn to a call pick-up system and a database search of multiple base stations, classified in class 455, subclass 524.
 - III. Claims 27-36, drawn to a method for processing calls by determination of group status, classified in class 455, subclass 417.
 - IV. Claims 37 and 38, drawn to a mobile terminal with caller identification display capabilities, classified in class 455, subclass 566.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I and III do not set forth details of searching a database for adjacent base stations as disclosed in invention II. The subcombination has separate utility such as invention II

Art Unit: 2683

details the necessity of a database that is used to determine base station eligibility. The subcombination of invention I has separate utility from invention III in that switch and VLR information needed in invention I is not specified in invention III.

3. Inventions I, II, and III are unrelated to invention IV. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I, II, and III are unrelated to invention IV in that invention IV relates to the display of caller identification in a mobile terminal.

4. A telephone call was made to Sam Ntiro on June 27, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFT 1.48(b) and by the fee required under 37 CFR 1.17(i).
